April 18, 2016

Dear Resident,

Beginning in late April, the Portage County Highway Department will begin a pavement maintenance project on CTH HH between Locust Street to just west of Olympia Avenue. The purpose of the project is two-fold:

1. Repair storm sewer structures – Many of the storm sewer manholes and inlets have concrete adjusting rings which have failed leading to the manhole and inlet covers settling. The first phase of the project will consist of closing one lane in each direction while a private contractor removes the covers and failed concrete adjusting rings. The failing concrete rings will be replaced with a high density plastic which will provide additional longevity and the covers will be adjusted to the correct elevation. This work is expected to begin in late April and will continue into late May.
2. Provide new pavement surface – Following the storm sewer adjustments, the top 2” of the asphaltic surface will be milled and a new pavement surface will be paved. Road signage and pavement markings will be replaced upon completion of the project. This work is expected to begin in early June and will be complete by early July.

The Highway Department is also working with the Parks Department to evaluate the Green Circle Trail crossing for options to replace the angled crossing with a more perpendicular crossing as part of the project.

All of the work is expected to be constructed with a single lane closure in each direction. Access will be maintained for residents during the project. There may be slight delays during certain aspects of the project such as when the paver is directly in front of a driveway but these will be limited. **Please remember to slow down and be aware in the construction work zone.** If you have any questions, please do not hesitate to call the Highway Department or email me at checkn@co.portage.wi.us.

Sincerely,

Nathan Check, PE
Highway Commissioner
